

**Data Structures - Fall 2020**  
**Faisal Khan:** [faisal.khan@nu.edu.pk](mailto:faisal.khan@nu.edu.pk)

**GrandTask-B**

**Q#2** Let say you have a string link list. You need to find a string with minimum length and string with maximum length.

“devops”-> “aiopss”-> “bell”->“in”->“is”

MAX: "devops", "aiopss"

MIN: "in", "is"
